

2/14/19

- Note:
- Steel Shell (WT: 2.0 - 2.5 mm) for impact resistance & shape retention.
 - Precision milled threads conform to the sub's thread & seal profile with tolerance for thread compound. Tough & chemically inert composite (Polyethylene type, Red color, will not react with thread compounds & solvents.)
 - Closed End (with a vent hole $\approx 3mm$) protector with a deep recess provide sample room for lifting hooks & composite barrier keeps dirt & moisture out of the inside of the pipe body.
 - All material requirements shall be according to ISO 11960/API 5CTD
